

Doing your best at A-level Chemistry

The course

We study OCR Salters Chemistry B.

<https://www.ocr.org.uk/Images/171723-specification-accredited-a-level-gce-chemistry-b-salters-h433.pdf>

The curriculum is a “spiral curriculum” meaning we revisit topics and build on prior knowledge and understanding. This gives students frequent opportunities to revise prior work and address problems. These are tied in with HIIT revision sessions in the first term and longer revision sessions in term 2

We don't plan to finish the course until at least Easter but this in no way limits students' ability to revise. Up to the time of the exam, students are revising and building on chemical concepts with new situations and constantly exploring exam technique by practising exam questions.

Study periods

Students should be in school for the majority of every day and should have a **study timetable** stating which subjects they are studying in each “free” period. They have been advised, guided and set these as tasks.

Our advice is that they get all their “homework” done at school so they can then use time at home solely for revision - this should also be based around a revision schedule

In-school revision sessions

HIIT revision sessions in term one (Friday lunchtime)

Longer revision sessions in term two; each week there will be an after-school sessions followed by an exam practice session.

Revision guides

These are available although they don't cover the fine details needed for the highest grades.

Revision videos

Past papers

Once students have revised a certain topic they can contact one of us and we can put together a selection of questions on that topic.

Alternatively, the link below takes them to full past papers all the way back to 2001

Kerboodle

This has access to lots of worksheets and questions which could supplement the revision

The teachers!

The students who do the best are those who contact their teachers whenever there is anything they not 100% confident about. Our students know and should feel able to ask any chemistry A level teacher for support and email or arranging to see us in and out of lessons

Put down any questions which crop up as they are revising and then get in touch with one of us

Stokesley Sixth Form College

Being the best we can be

After doing any revision they should also ask for practice questions.
